Proper Citation: Living Biobank (RRID:SCR_001510)

Description: Provides investigators with the opportunity to obtain on-demand biological samples from selected individuals that TrialNet has developed through the longitudinal monitoring of individuals at risk for the development of type 1 diabetes within the Natural History study. Exploratory research is encouraged under this initiative. Studies must use TrialNet screened subjects, and cannot interfere with ongoing clinical trials or studies. Investigators can select the clinical characteristics needed for their study as well as the sample type and collection frequency. Although many Living Biobank studies may be implemented through cost-sharing with the TrialNet network, special sample collections and visits outside of the normal visit schedules will incur additional costs which should be covered by the approved applicant. In addition, some studies may require effort from the TrialNet coordinating center, with costs covered by the approved ancillary study. Living biobank studies will be evaluated with careful consideration for their potential impact on the objectives and performance of the TrialNet Natural History study. To protect the interests of TrialNet, each living biobank study must be reviewed and approved by the Ancillary Studies Committee before its initiation. All approved living biobank studies will be reviewed yearly to evaluate their progress, and impact on TrialNet as a whole. TrialNet welcomes the submission of living biobank studies as an adjunct to ongoing protocols.

Abbreviations: Living Biobank

Synonyms: TrialNet Living Biobank

Resource Type: biomaterial supply resource, material resource

Keywords: whole blood, serum, plasma, dna, rna, peripheral blood mononuclear cell, blood

Related Condition: Type 1 diabetes, Diabetes

Availability: Free, Freely available

Resource Name: Living Biobank

Resource ID: SCR_001510

Alternate IDs: nlx_152813

Record Creation Time: 20220129T080208+0000

Record Last Update: 20260905T133224+0000
