Proper Citation: SISTEr (RRID:SCR_001542)

Description: Clinical trial under the Urinary Incontinence Treatment Network to compare the treatment success for two surgical procedures that are frequently used and have similar cure rates, yet have not been compared directly to each other in a large, rigorously conducted randomized trial. The secondary aims of the trial are to compare other outcomes for the two surgical procedures, including quality of life, sexual function, satisfaction with treatment outcomes, complications, and need for other treatment(s) after surgery. Follow-up will be a minimum of two years and up to four years.

Abbreviations: SISTEr

Synonyms: Stress Incontinence Surgical Treatment Efficacy Trial

Resource Type: clinical trial, data or information resource, data set, resource

Keywords: urinary, incontinence, dataset, surgical procedure, outcome, quality of life, sexual function, satisfaction, treatment, complication, burch procedure, sling procedure, female, surgery

Related Condition: Urinary incontinence, Stress, Stress urinary incontinence

Funding: NIDDK ;
NICHD

Availability: Free, Freely available

Resource Name: SISTEr

Resource ID: SCR_001542

Alternate IDs: nlx_152852
