Proper Citation: MorphoBank (RRID:SCR_003213)

Description: Web application providing online database and workspace for evolutionary research, specifically systematics (the science of determining the evolutionary relationships among species). It enables researchers to upload images and affiliate data with those images (labels, species names, etc.) and allows researchers to upload morphological data and affiliate it with phylogenetic matrices. MorphoBank is project-based, meaning a team of researchers can create a project and share the images and associated data exclusively with each other. When a paper associated with the project is published, the research team can make their data permanently available for view on MorphoBank where it is now archived.

Abbreviations: MorphoBank

Resource Type: data or information resource, database

Defining Citation: [PMID:34875801](#)

Keywords: phenotype, web service, phylogenetics, cladistics, histology, neurology, taxonomy, image, phylogeny, cladistic analysis, morphology, anatomy, evolution, homology, systems biology, FASEB list

Funding: NOAA NA04OAR4700191;
NSF

Availability: Free, Freely available

Resource Name: MorphoBank
