Proper Citation: FAIRsharing (RRID:SCR_004177)

Description: Web-based, searchable portal of three interlinked registries, containing both in-house and crowdsourced manually curated descriptions of standards, databases and data policies, combined with integrated view across all three types of resource. By registering your resource on FAIRsharing, you gain credit for your work, increase its visibility outside of your direct domain, reduce potential for unnecessary reinvention and proliferation of standards and databases.

Synonyms: BioSharing

Resource Type: data or information resource, database

Keywords: Metadata standard, ontology, data sharing, data policy, data standard

Availability: Free, freely available
