Proper Citation: NIH Topic Maps - A Topic Database of NIH Funded Grants (RRID:SCR_004180)

Description: There is a great demand for practical tools that enable scientists to understand the organization of the fields of research of interest to them. This project is an "unofficial" (i.e., non-supported by NIH itself) web-based system that helps researchers understand the "funding landscape" of a particular field through the use of statistical analysis of the language used in grant applications" abstracts. Our system is available at <https://app.nihmaps.org/>, providing both a query- and mapping- based interface for funded NIH-grants from 2007-2010. From its conception, this project has been a highly collaborative team effort. The project's main driving force has been provided by Ned Talley but has involved ideas, technical support, academic contributions and funding from multiple sources and people.
