Proper Citation: Scientific Data Sharing Project (RRID:SCR_004481)

Description: While many data sharing programs exist worldwide, widespread sharing of raw data has not yet won across-the-board acceptance in the scientific community, and the very existence of all these databases makes the approach fractured at best. The Data Sharing Project, launched last year by University of California-San Francisco Professor Michael Weiner, has two goals: One is to make widespread raw data sharing a reality initially in the realm of medicine through creation of a repository system accessible to all researchers; the second goal is to foster broad scientific support for this move and its adoption in other fields of research. With major projects such as the Human Genome Project demonstrating the tremendous scientific breakthroughs made possible by data sharing and with the decline of technological barriers impeding such efforts, the time has come to work to achieve widespread sharing of raw data worldwide. The Data Sharing Project proposes to further this goal initially in the field of medicine by working to create a raw data sharing program that will serve as a model to other disciplines attempting to make their own way in this arena. The Northern California Institute for Research and Education (NCIRE) together with the University of California-San Francisco and support from the Michael J. Fox Foundation is now in the process of canvassing the scientific community to analyze the best possible data sharing program and practices to establish in the field of medicine.

Synonyms: Data Sharing Project

Resource Type: data or information resource, knowledge environment, portal, topical portal

Funding: Michael J. Fox Foundation

Resource Name: Scientific Data Sharing Project

Resource ID: SCR_004481

Alternate IDs: nlx_46687

Record Creation Time: 20220129T080224+0000

Record Last Update: 20260905T132520+0000

Ratings and Alerts

No rating or validation information has been found for Scientific Data Sharing Project.

No alerts have been found for Scientific Data Sharing Project.
