Proper Citation: NCI Specimen Resource Locator (RRID:SCR_004754)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 11, 2023. The Specimen Resource Locator is a database to help researchers locate human specimens (tissue, serum, DNA/RNA, other specimens) for cancer research. It includes tissue banks and tissue procurement systems with access to normal, benign, precancerous and cancerous human tissue from a variety of organs. Researchers specify the types of specimens, number of cases, preservation methods and associated data they require. The Locator will then search the database and return a list of tissue resources most likely to meet their requirements. When no match is obtained, the researcher is referred to the NCI Tissue Expediter (tissexp@mail.nih.gov). The Tissue expediter is a scientist who can help researchers identify appropriate resources and/or appropriate collaborators.

Abbreviations: Specimen Resource Locator

Resource Type: data or information resource, database

Keywords: tumor, normal, microarray

Funding: NCI

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: NCI Specimen Resource Locator
