Proper Citation: NIH Biospecimens Interest Group (RRID:SCR_004903)

Description: The mission of the Biospecimens Interest Group is to serve as an educational and tutorial vehicle for disseminating information, best practices, regulations, and ethical/legal information formulated and issued by various NIH offices, federal agencies and other leading biospecimens organizations. Please join our listserv so we can inform you about the date, time and the place for future meetings, speakers, website and other activities --- <https://list.nih.gov/cgi-bin/wa?SUBED1=biospecimens&A=1>. Meetings and seminars are videocast. Vision: #. To create a place where all stakeholders may exchange scientific data, ideas, and information concerning the creation and use of high quality biospecimens for research, assay validation, technology development and other appropriate uses. #. To promote and facilitate interaction between NIH intramural and extramural stakeholders who are interested in and involved with a variety of clinically-oriented, translational research projects using high quality biospecimens. #. To encourage leading stakeholders to address critical elements in study design and statistical analysis of data to facilitate the production of accurate, optimal, and clinically meaningful results (best outcome). #. To educate stakeholders about the potential barriers and obstacles that may obstruct the sharing and collaboration between stakeholders across different organizations and countries. #. To increase the awareness for the necessity of high quality biospecimens and the harmonization, and when appropriate, standardized procedures (best practices, SOPs) for annotating, collecting, transporting, processing, storing, and sharing biospecimens to ensure optimal reproducibility of outcomes and the privacy of the patients (donors) through adherence to the ethical and legal requirements associated with the use of biospecimens. #. To provide the connectivity to various biorepositories and biospecimens around the world, especially those containing rare and difficult to get biospecimens.

Abbreviations: Biospecimens Interest Group

Resource Type: data or information resource, feed, knowledge environment, listserv, meeting resource, narrative resource, portal, standard specification, topical portal, training resource, video resource

Keywords: biorepository, biospecimen

Funding: Office of Rare Diseases Research ;
NCI Office of Biospecimens

Resource Name: NIH Biospecimens Interest Group

Resource ID: SCR_004903

Alternate IDs: nlx_143936

Record Creation Time: 20220129T080227+0000

Record Last Update: 20260905T132957+0000

Ratings and Alerts

No rating or validation information has been found for NIH Biospecimens Interest Group.
