Proper Citation: BioRep (RRID:SCR_004907)

Description: Offer biorepository services to public and private research institutes, to the highest standards of quality and safety with the aim of contributing to the advancement of medical research and scientific discovery. The BioRep Cell Repository establishes, maintains and distributes cell line cultures as well as DNA derived from these cultures. The scientific and business affiliation between BioRep and Coriell allows access to more than a million types of cell vials, stored in liquid nitrogen. Cells that have been stored for nearly 50 years, are still viable and available for research purposes today. Thanks to an exclusive agreement with the Coriell Institute for Medical Research, the oldest and largest biorepository of the world, BioRep is specialized in cell lines preparation, in nucleic acid extraction and long term storage in liquid nitrose (-196 degrees C) and in refrigerators (-80 degrees C) of any kind of biosamples, using procedures and standards developed by the Coriell in over 50 years of activity. BioRep and Coriell together constitute one of the few Global Biorepository able to serve the pharmaceutical industries for world wide clinical trials. BioRep facility is specifically designed to give the utmost efficiency and security by implementing Coriell procedures and standards. The BioRep Tissue Repository provides safe and secure storage of tissue specimens as required for medical research and scientific investigation. All tissues are preserved with the most current preservation techniques and processes. In addition to the storage service, BioRep provides Cell Biology, Molecular Biology, Microbiology services developed in ISO 9001:2008 certified laboratories.

Abbreviations: BioRep

Resource Type: biomaterial supply resource, cell repository, material resource

Keywords: chromosome analysis, dhplc analysis, methylation, genotyping, gender analysis, sequencing service, nucleic acid isolation, catalog, cell line, dna, cell, tissue, frozen, liquid nitrogen, vapor nitrogen, refrigerator, fixed, paraffin embedded, slide,

cryogenic, paraffin block, cryopreserved, molecular biology, microbiology, cytogenetics, media preparation, tissue microarray, cell array, frozen array, cell biology, research, transplantation, custom, blood, tissue, ebv transformed lymphoblast culture, fibroblast cell culture, nucleic acid, sequence, mycoplasma, karyotype

Availability: Public: offer biorepository services to public and private research institutes, To the highest standards of quality and safety. BioRep is one of the few ""Global Biorepository"" able to serve the pharmaceutical industries for world wide clinical trials.

Resource Name: BioRep

Resource ID: SCR_004907

Alternate IDs: nlx_87504

Old URLs: <http://www.biorep.it/eng/>

Record Creation Time: 20220129T080227+0000

Record Last Update: 20260912T200055+0000

Ratings and Alerts

No rating or validation information has been found for BioRep.

No alerts have been found for BioRep.
