Description: Web-based linked data server and browser specifically designed for ontology terms, it supports ontology visualization, query, and development. Ontobee provides a web interface for displaying the details and hierarchy of a specific ontology term. Meanwhile, Ontobee provides a RDF source code for the particular web page, which supports remote query of the ontology term and the Semantic Web. Ontobee provides an efficient and publicly available method to promote ontology sharing, interoperability, and data integration.

Abbreviations: Ontobee

Resource Type: controlled vocabulary, data or information resource, database, ontology, service resource

Keywords: visualization, query, development, ontology, ontology sharing, interoperability, data integration, sparql, FASEB list

Funding: NIAID R01AI081062

Availability: Public

Resource Name: Ontobee

Resource ID: SCR_006321
