### Resource Information

**URL:** <http://www.btool.org/ADGO2>

**Proper Citation:** ADGO (RRID:SCR\_006343)

**Description:** A web-based tool that provides composite interpretations for microarray data comparing two sample groups as well as lists of genes from diverse sources of biological information. It provides multiple gene set analysis methods for microarray inputs as well as enrichment analyses for lists of genes. It screens redundant composite annotations when generating and prioritizing them. It also incorporates union and subtracted sets as well as intersection sets. Users can upload their gene sets (e.g. predicted miRNA targets) to generate and analyze new composite sets.

**Abbreviations:** ADGO

**Resource Type:** analysis service resource, data analysis service, production service resource, service resource

**Defining Citation:** [PMID:21624890](#)

**Keywords:** microarray, gene, annotation, bio.tools

**Availability:** Acknowledgement requested

**Resource Name:** ADGO

**Resource ID:** SCR\_006343

**Alternate IDs:** OMICS\_02229, biotools:adgo

**Alternate URLs:** <https://bio.tools/adgo>

**Record Creation Time:** 20220129T080235+0000

**Record Last Update:** 20260821T042710+0000
