Proper Citation: Enzyme Nomenclature (RRID:SCR_006583)

Description: Recommendations of the Nomenclature Committee of the International Union of Biochemistry and Molecular Biology on the nomenclature and classification of enzymes by the reactions they catalyze. Also included are links to individual documents and advice is provided on how to suggest new enzymes for listing, or correction of existing entries. The common names of all listed enzymes are listed, along with their EC numbers. Where an enzyme has been deleted or transferred to another EC number, this information is also indicated. Each list is linked to either separate entries for each entry or to files with up to 50 enzymes in each file. A start has been made in showing the pathways in which enzymes participate. For other enzymes a glossary entry has been added which may be just a systematic name or a link to a graphic representation. The glossary from Enzyme Nomenclature, 1992 may also be consulted. This has been updated with subsequent glossary entries. Each enzyme entry has links to other databases. Enzyme Subclasses provide links to a list of sub-subclasses which in turn list the enzymes linked to separate files for each enzyme, or to a list as part of a file with up to 50 enzymes per file.

Abbreviations: Enzyme Nomenclature

Resource Type: data or information resource, data repository, data set, database, international standard specification, narrative resource, service resource, standard specification, storage service resource

Keywords: enzyme category, enzyme classification, enzyme nomenclature, enzyme reaction category, enzyme, classification, nomenclature, pathway, gold standard, FASEB list

Resource Name: Enzyme Nomenclature

Resource ID: SCR_006583

Alternate IDs: nif-0000-02804

Record Creation Time: 20220129T080237+0000

Record Last Update: 20260905T133000+0000

Ratings and Alerts

No rating or validation information has been found for Enzyme Nomenclature.

No alerts have been found for Enzyme Nomenclature.
