Proper Citation: Myrna (RRID:SCR_006951)

Description: A cloud computing tool for calculating differential gene expression in large RNA-seq datasets. It uses Bowtie for short read alignment and R/Bioconductor for interval calculations, normalization, and statistical testing. These tools are combined in an automatic, parallel pipeline that runs in the cloud (Elastic MapReduce in this case) on a local Hadoop cluster, or on a single computer, exploiting multiple computers and CPUs wherever possible.

Abbreviations: Myrna

Synonyms: Myrna: Cloud-scale differential gene expression for RNA-seq
