Proper Citation: University of Kansas Medical Center Pharmacology (RRID:SCR_007508)

Description: The Department of Pharmacology, Toxicology and Therapeutics at the University of Kansas Medical Center have faculty with diverse research interests. These three areas are essential for the development of new drugs and to determine the safety of all chemicals. Thus, students obtain a broad educational background in our department, which markedly increases their opportunities for employment. During the last three years, the Department has undergone a marked expansion. Seven new faculty have been hired. In addition, a number of new pieces of scientific equipment have been purchased: HPLC-MS/MS, nucleotide sequencer, robot, etc. In September of 2006 we plan to move into a new research building, as shown in the architects drawing. We also plan to hire six additional faculty the next three years. Thus, this department is an exciting place to be.
