Proper Citation: Health Research Funding (RRID:SCR_007790)

Description: Health Research Funding is designed to bring researchers with peer-reviewed, worthwhile, unfunded projects together with patient advocacy organizations and other funding sources. Working together, we hope to foster the funding of new research that will provide hope to millions of people in this country with chronic diseases and disabilities. * We invite researchers with promising projects that have been scored but not funded by the NIH to submit their abstracts. By registering, you will be able to search for information about organizations that fund research and their requests for abstracts. * Researchers with proposals that have been peer-reviewed but not funded by a NHC member patient advocacy organization may also register. The National Health Council (NHC) developed this site with input from the National Institutes of Health (NIH), the nation's medical research agency.
