Proper Citation: All the Virology on the WWW (RRID:SCR_008159)

Description: All the Virology on the WWW is a site for virology information on the Internet. They have collected all the virology related web sites that might be of interest to virologists, and others interested in learning more about viruses. Additionally, they have created an index to virus pictures on the web, The Big Picture Book of Viruses, which also functions as a resource for viral taxonomy. A collection of some of the best Online Virology and Microbiology Course Notes available can also be found here. If users are interested in even more information, The Virology Bookshop, an on-line microbiology and virology bookstore with a significant discount for our users. It is their goal that this site will provide both the professional virologist and the general public with access to information about viruses. Over the past several years, these pages have grown to encompass something of interest for everyone. The lists of virology related sites are divided into multiple pages, all of which are accessible from this page and from the more descriptive Complete Table of Contents. There are also links to Virology Dictionaries if users are confused by some of this site's more technical content. These sites are listed without bias and with much organization Categories: Metadatabases and Directories
