Proper Citation: EGAN: Exploratory Gene Association Networks (RRID:SCR_008856)

Description: Exploratory Gene Association Networks (EGAN) is a software tool that allows a bench biologist to visualize and interpret the results of high-throughput exploratory assays in an interactive hypergraph of genes, relationships (protein-protein interactions, literature co-occurrence, etc.) and meta-data (annotation, signaling pathways, etc.). EGAN provides comprehensive, automated calculation of meta-data coincidence (over-representation, enrichment) for user- and assay-defined gene lists, and provides direct links to web resources and literature (NCBI Entrez Gene, PubMed, KEGG, Gene Ontology, iHOP, Google, etc.). EGAN functions as a module for exploratory investigation of analysis results from multiple high-throughput assay technologies, including but not limited to: * Transcriptomics via expression microarrays or RNA-Seq * Genomics via SNP GWAS or array CGH * Proteomics via MS/MS peptide identifications * Epigenomics via DNA methylation, ChIP-on-Chip or ChIP-Seq * In-silico analysis of sequences or literature EGAN has been built using Cytoscape libraries for graph visualization and layout, and is comparable to DAVID, GSEA, Ingenuity IPA and Ariadne Pathway Studio. There are pre-collated EGAN networks available for human (*Homo sapiens*), mouse (*Mus musculus*), rat (*Rattus norvegicus*), chicken (*Gallus gallus*), zebrafish (*Danio rerio*), fruit fly (*Drosophila melanogaster*), nematode (*Caenorhabditis elegans*), mouse-ear cress (*Arabidopsis thaliana*), rice (*Oryza sativa*) and brewer's yeast (*Saccharomyces cerevisiae*). There is now an EGAN module available for GenePattern (human-only). Platform: Windows compatible, Mac OS X compatible, Linux compatible

Abbreviations: EGAN

Synonyms: Exploratory Gene Association Networks, Exploratory Gene Association Networks (EGAN)

Resource Type: data analysis software, data processing software, software application, software resource

Defining Citation: [PMID:19933825](#)

Keywords: gene, gene association, network, protein-protein interaction, pathway, interaction, annotation, signaling pathway, enrichment, cytoscape, visualization

Funding: NCI P30 CA92103

Availability: Free for academic use

Resource Name: EGAN: Exploratory Gene Association Networks

Resource ID: SCR_008856

Alternate IDs: nlx_149222

Record Creation Time: 20220129T080249+0000

Record Last Update: 20260905T132629+0000

Ratings and Alerts

No rating or validation information has been found for EGAN: Exploratory Gene Association Networks.

No alerts have been found for EGAN: Exploratory Gene Association Networks.
