Proper Citation: JSU Molecular and Cellular Biology Core Laboratory (RRID:SCR_009896)

Description: Core facility that provides the following services: Genomics service, Proteomics services, Functional assays service, Cell culture services, Stress enzyme analysis. The specific aims of the MCB Core Laboratory are: To provide a variety of services and technical support in molecular biology and DNA technology by offering equipment access, expert advice, demonstration of techniques, operation of equipment, participation in discussion and data interpretation, and hands-on-training in molecular biology and cell culture; to increase faculty training in recombinant DNA technology to strengthen faculty development and technology transfer; to provide a research environment and instrumentation for investigators to pursue biomedical research opportunities and enhance overall research productivity; to foster collaborative research relationships among RCMI investigators and other MCB core users at JSU and other research intensive institutions.

Resource Type: access service resource, core facility, service resource
