Proper Citation: UH Manoa Microscopy and Imaging Core (RRID:SCR_010050)

Description: The Microscopy and Imaging Core at the University of Hawaii Cancer Center (CC) provides access to a wide range of imaging instruments to UHCC member, and will soon extend the service to non-members. The facility also offers access to a licensed MetaMorph software package for the processing and analysis of microscopy images. Currently, the core houses four major instruments and three microscopes for routine fluorescence and brightfield use. The core is also in charge of maintenance and service of an IVIS Lumina (Caliper Life Sciences). This is a highly sensitive system to image fluorescent and/or bioluminescent reporters both in vivo and in vitro.

Synonyms: UH Manoa Microscopy & Imaging Core
