**Proper Citation:** UCSD Digital Collections (RRID:SCR\_010221)

**Description:** A discovery interface of digital objects, including documents, photographs, audio, video, and data sets, which reflect a range of materials collected, managed, and preserved by the UCSD Library to support teaching, learning and research. Content has been drawn from across the Library collections with strengths in the areas of Baja California, Melanesia, Oceanography, and UC San Diego history. Access to more content will increase over time. Items have been digitized from the original primary sources in our collections, and recently the Library began to partner with UC San Diego researchers on campus to make research data more readily available. The Digital Collections website gathers data into two broad categories of content: Library Digital Collections contains digitized versions of selected collections covering topics such as art, film, music, history and anthropology.
