Proper Citation: Provenance Ontology (RRID:SCR_010415)

Description: Ontology that expresses the PROV Data Model using the OWL2 Web Ontology Language (OWL2) providing a set of classes, properties, and restrictions that can be used to represent and interchange provenance information generated in different systems and under different contexts. It can also be specialized to create new classes and properties to model provenance information for different applications and domains.

Abbreviations: PROVO

Synonyms: PROV-O

Resource Type: controlled vocabulary, data or information resource, ontology

Keywords: owl

Resource Name: Provenance Ontology

Resource ID: SCR_010415

Alternate IDs: nlx_157563
