BCCA Cancer Drug Manual (RRID:SCR_013013)

Resource Information

URL: <http://www.bccancer.bc.ca/HPI/DrugDatabase/default.htm>

Proper Citation: BCCA Cancer Drug Manual (RRID:SCR_013013)

Description: The information in this manual is presented to assist health care professionals caring for cancer patients undergoing treatment with cytotoxics, hormones or biological response modifiers. It is designed primarily for pharmacists and nurses in general practice, and may also be of interest to the family physician who is treating a patient in consultation with an oncologist. Efforts have been made to include information specific to the use of these drugs in the child with cancer. Because of the nature of individual drug monographs, this manual does not deal with therapeutics. For treatment decisions, the reader is referred to the protocol by which the patient is being treated, to the British Columbia Cancer Agency's Cancer Management Manual and to the most current literature. The Cancer Drug Manual also provides a drug index for physicians and patients. The BC Cancer Agency, an agency of the Provincial Health Services Authority, provides a province-wide, population-based cancer control program for the residents of British Columbia and the Yukon. The BC Cancer Agency's mandate covers the spectrum of cancer care, from prevention and screening, to diagnosis, treatment, and through to rehabilitation. The BC Cancer Agency's mandate is driven by a three-fold mission: -To reduce the incidence of cancer -To reduce the mortality rate of people with cancer -To improve the quality of life of people living with cancer
