Genetic Codes

RRID:SCR_013092

Type: Tool

Proper Citation

Genetic Codes (RRID:SCR_013092)

Resource Information

URL: <http://www.ncbi.nlm.nih.gov/Taxonomy/Utils/wprintgc.cgi>

Proper Citation: Genetic Codes (RRID:SCR_013092)

Description: Genetic Codes is a summary resource of the taxonomy of each record and assignment of the correct genetic code for every entry in the GenBank database. GenBank format by historical convention displays mRNA sequences using the DNA alphabet. Thus, for the convenience of people reading GenBank records, the genetic code tables shown here use T instead of U. The following genetic codes are described here: The Standard Code The Vertebrate Mitochondrial Code The Yeast Mitochondrial Code The Mold, Protozoan, and Coelenterate Mitochondrial Code and the Mycoplasma/Spiroplasma Code The Invertebrate Mitochondrial Code The Ciliate, Dasycladacean and Hexamita Nuclear Code The Echinoderm and Flatworm Mitochondrial Code The Euplotid Nuclear Code The Bacterial, Archaeal and Plant Plastid Code The Alternative Yeast Nuclear Code The Ascidian Mitochondrial Code The Alternative Flatworm Mitochondrial Code Blepharisma Nuclear Code Chlorophycean Mitochondrial Code Trematode Mitochondrial Code Scenedesmus Obliquus Mitochondrial Code Thraustochytrium Mitochondrial Code

Synonyms: Genetic Codes

Resource Type: data or information resource, database

Keywords: genbank, genetic code, mrna sequences

Resource Name: Genetic Codes

Resource ID: SCR_013092

Alternate IDs: nif-0000-02888

Record Creation Time: 20220129T080314+0000

Record Last Update: 20260905T133204+0000

Ratings and Alerts

No rating or validation information has been found for Genetic Codes.

No alerts have been found for Genetic Codes.
