### Resource Information

**URL:** <http://plantgrn.noble.org/psRNATarget/>

**Proper Citation:** psRNATarget (RRID:SCR\_013321)

**Description:** A plant small RNA target analysis server which features two important analysis functions: 1) reverse complementary matching between miRNA and target transcript using a proven scoring schema, and 2) target site accessibility evaluation by calculating unpaired energy (UPE) required to "open" secondary structure around miRNA's target site on mRNA. PsRNATarget incorporates recent discoveries in plant miRNA target recognition, e.g. it distinguishes translational and post-transcriptional inhibition, and it reports the number of miRNA/target site pairs that may affect miRNA binding activity to target transcript. PsRNATarget is designed for high-throughput analysis of next-generation data with an efficient distributed computing back-end pipeline that runs on a Linux cluster. The server front-end integrates three simplified user-friendly interfaces to accept user-submitted or preloaded miRNAs and transcript sequences; and outputs a comprehensive list of miRNA / target pairs along with the online tools for batch downloading, key word searching and results sorting., THIS RESOURCE IS NO LONGER IN SERVICE. Documented on September 16,2025.

**Abbreviations:** psRNATarget

**Synonyms:** psRNATarget: A Plant Small RNA Target Analysis Server

**Resource Type:** analysis service resource, data analysis service, production service resource, service resource

**Defining Citation:** [PMID:21622958](#)

**Keywords:** bio.tools

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** psRNATarget

**Resource ID:** SCR\_013321

**Alternate IDs:** OMICS\_00414, biotools:psrnatarget

**Alternate URLs:** <https://bio.tools/psrnatarget>

**Record Creation Time:** 20220129T080315+0000

**Record Last Update:** 20260905T133205+0000
