Proper Citation: UCSD Human Milk Biorepository (RRID:SCR_014059)

Description: A biorepository which collects and distributes human breast milk samples to the research community, as well as a research initiative which aims to learn more about the benefits of human milk, how it influences infant and child health and development, and the extent to which medications and other substances can be found in human milk. Nursing mothers who choose to donate are asked to provide around 2 ounces of breast milk to be used for future research projects. Breast milk, which include disease-specific and normal breast milk samples, is stored in the research bank for approved projects.

Synonyms: UCSD Breast Milk Research Bank
