Proper Citation: FinchScope project (RRID:SCR_021484)

Description: Project related to fluorescent imaging. Provides single photon fluorescent imaging microscope systems. System includes modular in vivo all optical neurophysiology rigs with transparent hardware, and acquisition and analysis software. Provide designs for 3D printed, lightweight, wireless capable microscope and motorized commutator, designed for multi month monitoring neural activity of zebra finches while they sing their courtship songs. Adapted for rodents and birds such as canaries.

Synonyms: FinchScope
