Proper Citation: monaLisa (RRID:SCR_022802)

Description: Software R package to work with sequence motifs in analysis of genomics data. These include methods to annotate genomic regions or sequences with predicted motif hits and to identify motifs that drive observed changes in accessibility or expression. Functions to produce informative visualizations of obtained results are also provided.

Resource Type: software resource, software toolkit

Defining Citation: [PMID:35199152](#)

Keywords: sequence motifs, analysis of genomics data, annotate genomic regions or sequences, predicted motif hits, identify motifs

Funding: Novartis Research Foundation ;
Swiss National Science Foundation ;
European Research Council

Availability: Free, Available for download, Freely available

Resource Name: monaLisa

Resource ID: SCR_022802

Alternate URLs: <https://github.com/fmicompbio/monaLisa>

License: GPL v3

Record Creation Time: 20220929T050157+0000

Record Last Update: 20260801T042904+0000
