Proper Citation: Agilent: BioTek Cytation C10 Confocal Imaging Reader (RRID:SCR_027510)

Description: Imaging reader combines automated confocal and widefield microscopy with conventional multimode microplate reading. Automated water-immersion objectives capture more light, driving lower exposure times and reducing phototoxic impacts on live cells. Spinning-disk confocal module and accompanying disk pinhole options for looking deeper into thick sample biology with improved clarity and detail. High-quality components used in system, including Hamamatsu scientific CMOS (sCMOS) camera, Olympus objectives and laser-based illumination enable excellent image quality. Cytation C10 also includes widefield fluorescence, brightfield, and phase contrast optics. Onboard environmental controls enable live cell assays.
