Description: Rattus norvegicus with name LN from RGD.

Species: Rattus norvegicus

Notes: This is the normotensive control strain established from the selective breeding In 1969. Outbred Sprague-Dawley rats were selected for systolic blood pressure trait using an indirect plethysmographic technique in pre-warmed unrestrained conscious rats. Three pairs were originally selected, and selection was continued with brother x sister mating. Strain LH was maintained as a hypertensive strain, and LL as a hypotensive strain. (see Vincent et al 1984, and Vincent and Sassard, 1994 for reviews). This LN is the parent to LN substrains maintained in other institutions.

Catalog Number: 405878050

Background: inbred

Database: Rat Genome Database (RGD)

Database Abbreviation: RGD

Availability: Unknown

Alternate IDs: 405878050

Organism Name: LN

Record Creation Time: 20240716T195800+0000

Record Last Update: 20260725T194312+0000
