Proper Citation: RRID:RGD_70411

Description: Rattus norvegicus with name ANA from RGD.

Species: Rattus norvegicus

Synonyms: , Non-Alcohol

Notes: Wistar rats were outbred and selected for breeding animals that differ in their alcohol consumption. Marked difference between the strains and sex was visible by the eighth generation. After puberty the animals were isolated and given 10% alcohol as fluid for 10 days, then they had access to water and alcohol for 4 weeks. The quantity of fluid intake was measured daily, as fluid intake of animals varied greatly in animals consuming the same amount of alcohol per unit body weight. Therefore, alcohol intake was kept as a phenotypic measure.

Catalog Number: 70411

Background: inbred

Database: Rat Genome Database (RGD)

Database Abbreviation: RGD

Availability: Unknown

Alternate IDs: 70411

Organism Name: ANA

Record Creation Time: 20230509T191928+0000

Record Last Update: 20260725T194230+0000

Ratings and Alerts

No rating or validation information has been found for ANA.
