Adult Blood Lead Epidemiology and Surveillance Interactive Database (RRID:SCR_006915)

Resource Information

**Proper Citation:** Adult Blood Lead Epidemiology and Surveillance Interactive Database (RRID:SCR_006915)

**Description:** Interactive data set on lead exposure (Blood Lead Concentrations greater than or equal to 25 micrograms per deciliter) of adults in the United States. The data comes from laboratory-reported elevated blood lead levels. Recent research has led to increased concerns about the toxicity of lead at low doses. Reflecting this increased concern, the ABLES program updated its case definition for an elevated BLL to a blood lead concentration greater than or equal to 10 micrograms per deciliter in 2009. This new case definition has also been: (1) recommended by the Council of State and Territorial Epidemiologists in 2009; (2) included in CDC"s list of nationally notifiable conditions in 2010; and (3) adopted as the Healthy People 2020 Occupational Safety and Health Objective 7. Given this new case definition, NIOSH will update the ABLES Charts and Interactive Database to include lead exposures to blood lead level greater than or equal to 10 micrograms per deciliter in the near future.

**Abbreviations:** ABLES Interactive Database

**Synonyms:** Adult Blood Lead Epidemiology and Surveillance (ABLES) Interactive Database

**Resource Type:** data or information resource, data set

**Keywords:** blood, lead, occupational disease, blood lead level, lead exposure, occupational exposure, adult human, non-occupational exposure, male, female, prevalence rate, incidence rate, prevalence, incidence
**Related Condition:** Elevated blood lead level, Occupational disease

**Funding Agency:** National Institute for Occupational Safety and Health

**Availability:** Open unspecified license

**Resource Name:** Adult Blood Lead Epidemiology and Surveillance Interactive Database

**Resource ID:** SCR_006915

**Alternate IDs:** nlx_152003
