HUDSEN Electronic Atlas of the Developing Human Brain (RRID:SCR_002056)

Resource Information

**URL:** [http://database.hudsen.eu/](http://database.hudsen.eu/)

**Proper Citation:** HUDSEN Electronic Atlas of the Developing Human Brain (RRID:SCR_002056)

**Description:** Interactive digital atlas and movies comprising 3-D reconstructions at all stages of human development from Carnegie Stage 12 (CS12; ~26 days post conception (dpc)) to CS23 (~ 56 dpc) and anatomical annotations of the 3-D models linked to an anatomical database. The 3D models are generated using Optical Projection Tomography (OPT; Sharpe et al 2002). The digital atlas is also linked to a gene expression database that has been developed from the Edinburgh Mouse Atlas Project gene expression database (EMAGE). In the future, the HUDSEN EADHB aims to provide the wider scientific and medical communities with a dynamic tool for documenting and analyzing gene expression patterns and morphological changes in the developing human brain.

**Abbreviations:** EADHB, HUDSEN EADHB

**Synonyms:** Electronic Atlas of the Developing Human Brain

**Resource Type:** video resource, atlas, data or information resource

**Defining Citation:** PMID:20979583

**Keywords:** human development, carnegie stage, annotation, optical projection tomography, embryonic human, embryo, 3d, 3d model, brain, gene expression, anatomy, molecular neuroanatomy resource, developing
Funding Agency: NIMH, NICHD

Resource Name: HUDSEN Electronic Atlas of the Developing Human Brain

Resource ID: SCR_002056

Alternate IDs: nif-0000-12494
