**Description:** A suite of open access, scholarly publishing services and research tools that enable departments, research units, publishing programs, and individual scholars associated with the University of California to have direct control over the creation and dissemination of the full range of their scholarship. Content is delivered via a dynamic research platform and is available to scholars worldwide. eScholarship allows users to publish the following original scholarly works on a dynamic research platform available to scholars worldwide: Books, Journals, Working Papers, Previously Published Works, and Conferences. eScholarship also provides deposit and dissemination services for postprints, or previously published articles. Publications benefit from manuscript and peer-review management systems, as well as a full range of persistent access and preservation services.
