**Description:** A web-based hosting service for software development projects that use the Git revision control system offering powerful collaboration, code review, and code management. It offers both paid plans for private repositories, and free accounts for open source projects. Large or small, every repository comes with the same powerful tools. These tools are open to the community for public projects and secure for private projects. Features include: * Integrated issue tracking * Collaborative code review * Easily manage teams within organizations * Text entry with understated power * A growing list of programming languages and data formats * On the desktop and in your pocket - Android app and mobile web views let you keep track of your projects on the go.

**Abbreviations:** GitHub

**Resource Type:** software resource, service resource, software repository, commercial organization, software application, mobile app

**Keywords:** source code, database, java, php, python, objective-c, c++, c, c#, perl, issue, computer science, FASEB list

**Availability:** Public, Free, Paid plan
