Proper Citation: Publish or perish (RRID:SCR_005968)

Description: Software program that allows researchers to perform citation analysis and calculate various impact metrics. It uses Google Scholar to obtain the raw citations, then analyzes these and presents the following statistics: * Total number of papers * Total number of citations * Average number of citations per paper * Average number of citations per author * Average number of papers per author * Average number of citations per year * Hirsch's h-index and related parameters * Egghe's g-index * The contemporary h-index * The age-weighted citation rate * Two variations of individual h-indices * An analysis of the number of authors per paper. The results are available on-screen and can also be copied to the Windows clipboard (for pasting into other applications) or saved to a variety of output formats (for future reference or further analysis). The Publish or Perish software is a Microsoft Windows application that can also be installed and used on Apple Mac OS X and GNU/Linux computers, with the aid of a suitable emulator such as Wine or CrossOver Mac.

Abbreviations: PoP

Resource Type: software resource, software application

Keywords: impact factor, altmetrics, citation analysis, metrics, windows

Availability: Acknowledgement requested

Resource Name: Publish or perish

Resource ID: SCR_005968

Alternate IDs: nlx_151328
