Target Antigen: TCF2 / VHNF1 antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: Western Blot; ELISA; ELISA, Western Blot. Approx 60kDa band observed in Human Liver lysates (calculated MW of 61.3kDa according to NP_000449.1). Recommended concentration: 0.1-0.3µg/ml. An additional band of unknown identity was also consistently observed at 100kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? This antibody is expected to recognize both reported isoforms (NP_000449.1 and NP_006472.1).
