Proper Citation: ExploreDTI (RRID:SCR_001643)

Description: A graphical toolbox developed in Matlab for exploratory diffusion (tensor) MRI and fiber tractography. It includes diffusion reconstruction approaches, analysis and visualization tools for fiber tractography, atlas based segmentation, and connectivity networks. It also provides a wide range of quality assessment and pre-processing tools. Main features: * Visualization of scalar and vector maps of various diffusion tensor properties * Display of principal diffusion vectors, cuboids, and ellipsoids with several color-encodings * Deterministic (streamline) and 'probabilistic' (wild-bootstrap) fiber tractography * Clustering of fiber tracts * Data quality assessment tools * HARDI reconstructions (Q-ball and spherical deconvolution imaging) * Tract-specific measurements * Tract-segment analysis * Motion / distortion correction (with B-matrix rotation!) * Other cool stuff... (see publication link)

Abbreviations: ExploreDTI

Synonyms: Explore DTI

Resource Type: image processing software, software toolkit, image analysis software, software resource, software application, data processing software

Keywords: diffusion mri, fiber tractography, dti, matlab, visualization, segmentation, connectivity network, quality assessment, pre-processing

Availability: Free, Freely Available

Resource Name: ExploreDTI

Resource ID: SCR_001643

Alternate IDs: nlx_153916

Record Creation Time: 20220129T080208+0000

Record Last Update: 20260808T185742+0000

Ratings and Alerts

No rating or validation information has been found for ExploreDTI.

No alerts have been found for ExploreDTI.
