Proper Citation: National Cancer Research Institute (RRID:SCR_004057)

Description: The National Cancer Research Institute (NCRI) is a UK-wide partnership between the government, charity and industry which promotes co-operation in cancer research among the 22 member organizations for the benefit of patients, the public and the scientific community. Cancer affects everyone. One third of people in the UK get cancer at some time in their lives and a quarter of all people die from it. This means that even if we don't have cancer ourselves, we know someone who does, or soon will.

Abbreviations: NCRI

Synonyms: NCRI - National Cancer Research Institute
