Proper Citation: British Columbia Tumour Tissue Repository (RRID:SCR_004597)

Description: A provincial biobank resource to support translational cancer research at the BC Cancer Agency, across Canada and internationally. This biobank collects biospecimens (tissues and blood), and clinical information and processes these to create anonymous cases that can be studied by cancer researchers to understand how cancer develops, how it grows, how it spreads, and how it responds to treatment. These tissues and data are obtained from patients who undergo surgery to treat a tumor and who have generously provided their consent for the TTR to collect tissues that are unused after diagnosis has been completed. The TTR is a provincial program that currently comprises a core biobank at the Vancouver Island Center, Victoria, that offers participation in the program to patients in Victoria and Nanaimo. The TTR works with other banks and expert translational research groups in BC, to create expanded capacity for collection and opportunities for research access to tissue resources. The TTR operates under the management and oversight of the director, a scientific advisory board, and the UBC BCCA Research Ethics Board. The TTR operates within organizational policies and a commitment to protection of donor privacy that is embodied in all standard operating procedures and aspects of the repository. The TTR is also a founding member and contributor to the development of provincial (BC BioLibrary) and national (CTRNet) initiatives to promote biobanking.

Abbreviations: BCCA-TTR, TTR

Synonyms: BC Cancer Agency Tumor Tissue Repository, BC Cancer Agency TTR, BCCA Tumour Tissue Repository, BC Cancer Agency Tumour Tissue Repository

Resource Type: tissue bank, biomaterial supply resource, material resource

Keywords: blood, tissue, clinical information

Related Condition: Cancer, Tumor

Funding: BC Cancer Foundation

Resource Name: British Columbia Tumour Tissue Repository

Resource ID: SCR_004597

Alternate IDs: nlx_58550

Record Creation Time: 20220129T080225+0000

Record Last Update: 20260729T044102+0000
