Proper Citation: University of Illinois at Urbana-Champaign; Beckman Institute for Advanced Science and Technology (RRID:SCR_007442)

Description: The Beckman Institute for Advanced Science and Technology at the University of Illinois at Urbana-Champaign is an interdisciplinary research institute devoted to leading-edge research in the physical sciences, computation, engineering, biology, behavior, cognition, and neuroscience. It offers senior, graduate, postdoctoral, and Carle-Beckman fellowships. The Beckman Institute Postdoctoral Fellows program is intended for recent Ph.D.s or students in their final year of doctoral study with research interests relevant to the Beckman Institute. A competition is held yearly and four fellows are selected for terms of up to three years. The Beckman Graduate Fellows Program, offers University of Illinois graduate students at the M.A., M.S., or Ph.D. level the opportunity to pursue interdisciplinary research at the Institute. The Senior Fellows Program gives established faculty from other universities the opportunity to do short-term, onsite, interdisciplinary research with other Beckman Institute researchers. Participation in the Senior Fellows Program is by invitation from the Beckman Institute. Usually Senior Fellows have previous ties to Beckman researchers and stay for a period of three to six months. Beckman Institute research is focused around four research themes: Biological Intelligence, Human-Computer Intelligent Interaction, Integrative Imaging, and Molecular and Electronic Nanostructures. More than 600 researchers from 40 University of Illinois departments as far-ranging as psychology, computer science, and biochemistry, comprising 13 Beckman Institute groups, work within and across these overlapping areas. The building is magnificent and offers more than 200 offices; specialized, state-of-the-art laboratories and other facilities; and meeting areas. The Arnold and Mabel Beckman Foundation provides ongoing financial assistance for various Institute and campus programs. Daily operating expenses of the Institute are funded by the state and its

research programs are mainly supported by external funding from the federal government, corporations, and foundations.
