Description: A biopharmaceutical company that focuses on central nervous system (CNS) diseases. The company is the result of a merger between Alkermes, Inc. and Elan Drug Technologies (EDT), the former drug formulation and manufacturing division of Elan Corporation, plc. The company is headquartered in Dublin, and has an R&D center in Waltham, Massachusetts and manufacturing facilities in Athlone, Ireland; Gainesville, Georgia; and Wilmington, Ohio. Alkermes has more than 20 commercial drug products and candidates that address serious and chronic diseases such as addiction, schizophrenia, diabetes and depression. Among these, five products are primary to the company: risperidone Long-Acting Injection (Risperdal Consta) for schizophrenia and bipolar 1 disorder, paliperidone palmitate (Invega Sustenna in the U.S., Xeplion in Europe) for schizophrenia, 4-aminopyridine (Ampyra in the U.S., Fampyra in Europe) to improve walking in patients with multiple sclerosis, naltrexone for extended-release injectable suspension (Vivitrol) for alcohol and opioid dependence, and exenatide extended-release for injectable suspension (Bydureon) for the treatment of type 2 diabetes. Bydureon is a once-weekly, long-acting form of the drug exenatide (Byetta) and was developed through a partnership between Amylin, Alkermes and Eli Lilly. It is approved in Europe and the U.S. (Wikipedia)
