Proper Citation: Sanford Burnham Prebys Medical Discovery Institute X-ray
Crystallography Facility (RRID:SCR_014860)

Description: Facility equipped with X-ray crystallography equipment, such as the Rigaku FR-E SuperBright Ultra high-intensity rotating anode generator. The instrument is intended for self-usage by trained users. It utilizes both ports with two independent diffraction stations that can run simultaneously. Each station is equipped with an X-stream cryogenic system for standard low temperature (~100 K) data collection. The system is used to collect high resolution diffraction data from native and inhibitor-bound crystals or to test and optimize diffraction quality (cryo-protectant conditions, etc.) and screen for further data collection at synchrotron sources.

Synonyms: SBP X-ray Crystallography Facility, SBP Medical Discovery Institute X-ray Crystallography Facility

Resource Type: material resource, instrument supplier

Keywords: x ray, crystallography, diffraction, data, inhibitor-bound crystals, synchrotron

Availability: Commercially available

Resource Name: Sanford Burnham Prebys Medical Discovery Institute X-ray
Crystallography Facility

Resource ID: SCR_014860

Record Creation Time: 20220129T080322+0000

Record Last Update: 20260808T190628+0000

Ratings and Alerts

No rating or validation information has been found for Sanford Burnham Prebys Medical Discovery Institute X-ray Crystallography Facility.

No alerts have been found for Sanford Burnham Prebys Medical Discovery Institute X-ray Crystallography Facility.
