Description: Commercial organization which provides molecular and drug discovery software and services to researchers. American software company that develops chemical simulation software for use in pharmaceutical, biotechnology, and materials science research. Provides products ranging from general molecular modeling programs to a full suite of chemical simulation and drug design software, including ligand- and structure-based methods.

Synonyms: Schrodinger Inc.

Resource Type: commercial organization

Keywords: software solution, drug discovery, small molecule, computational chemistry

Resource Name: Schrodinger
