Proper Citation: UMass Amherst Mass Spectrometry Core Facility (RRID:SCR_019063)

Description: Core offers instrumentation for characterizing elements and compounds across the entire mass range. Specialized mass spectrometers encompass variety of ionization techniques and separation devices to cover wide range of analytical capabilities. Facility accepts samples and will perform requested analysis. Offers training to conduct experimentation. Instruments include Bruker Solarix FT-ICR, Bruker MicroTOF II ESI, Bruker MicroFLEX MALDI, JEOL MStation sector with EI and FAB sources.
