Description: M4 TORNADO is the tool of choice for sample characterization using small-spot Micro X-ray Fluorescence (Micro-XRF) for information on composition and element distribution. Optimized for analysis speed and without compromising accuracy it measures a wide range of samples. Whether small or large, even or irregularly shaped equipped with a large high-speed stage it supports 2D analysis of virtually any kind of inorganic, organic, and even of liquid sample. Its large vacuum chamber enables light element detection.
