Proper Citation: Nikon: SMZ-1 Microscope (RRID:SCR_020328)

Description: Nikon SMZ-1 and SMZ-1B zoom stereo microscopes offer legendary Nikon stereo performance. Developed to fit a variety of applications and OEM needs, these advanced-design stereo microscopes have the features and image quality you expect from Nikon. High-performance optics and a 6V/10W halogen illuminator deliver images with excellent contrast, resolution, and brightness. The SMZ-1 and SMZ-1B are human-engineered to allow long periods of operation without fatigue. Mechanical design is yet rugged for daily trouble-free operation in industrial, laboratory, and classroom environments. All controls are easy to use. Nikon's versatile modular approach allows the SMZ-1/1B to be easily adapted to various configurations such as stand, arm, or table mounting. Similarly, the illuminator can be fixed to the instrument stand, placed in a diascope base, or attached externally for oblique lighting. The SMZ-1/1B use a Nikon-designed twin-lens objective system inclined at 12°. Only the center of the lenses is used to provide the sharpest three-dimensional image and enable the operator to work more accurately and efficiently for prolonged periods without eye strain.
