Proper Citation: LinCoM (RRID:SCR_021519)

Description: Software MATLAB package for linearization of place fields in complex mazes. Graph theoretic approach for production of linear place fields in complex mazes. Used for producing linear place fields for hippocampal cells during behavior in complex mazes. Specifically designed to deal with mazes with one or more decision points (e.g., T-maze, W-maze, double T-maze, radial maze, plus maze, etc).

Synonyms: Linear place fields in Complex Mazes

Resource Type: software application, data analysis software, software resource, data processing software, software toolkit

Defining Citation: [DOI:10.1101/2020.08.17.253849](https://doi.org/10.1101/2020.08.17.253849)

Keywords: Place fields linearization, complex mazes, producing linear place fields, hippocampal cells, complex mazes behavior, OpenBehavior

Availability: Free, Available for download, Freely Available

Resource Name: LinCoM

Resource ID: SCR_021519
