Proper Citation: miRNAMap (RRID:SCR_003156)

Description: A database of experimentally verified microRNAs and miRNA target genes in human, mouse, rat, and other metazoan genomes. In addition to known miRNA targets, three computational tools previously developed, such as miRanda, RNAhybrid and TargetScan, were applied for identifying miRNA targets in 3'-UTR of genes. In order to reduce the false positive prediction of miRNA targets, several criteria are supported for filtering the putative miRNA targets. Furthermore, miRNA expression profiles can provide valuable clues for investigating the properties of miRNAs, such tissue specificity and differential expression in cancer/normal cell. Therefore, we performed the Q-PCR experiments for monitoring the expression profiles of 224 human miRNAs in eighteen major normal tissues in human. The cross-reference between the miRNA expression profiles and the expression profiles of its target genes can provide effective viewpoint to understand the regulatory functions of the miRNA.

Abbreviations: miRNAMap

Resource Type: data or information resource, database

Defining Citation: PMID:18029362, PMID:16381831

Keywords: microrna, genome, FASEB list

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: miRNAMap

Resource ID: SCR_003156

Alternate IDs: OMICS_00408, nif-0000-03138

Record Creation Time: 20220129T080217+0000

Record Last Update: 20260912T200128+0000

Ratings and Alerts

No rating or validation information has been found for miRNAMap.

No alerts have been found for miRNAMap.
