Proper Citation: Danish Multiple Sclerosis Center (RRID:SCR_004424)

Description: The Danish Multiple Sclerosis Center (DMSC) comprises the MS Clinic and the MS Research Unit including the Neuroimmunology Laboratory. The main research areas are: clinical research including investigator driven trials of new therapies in MS, neuroimaging, neuropsychology and rehabilitation; pathogenesis of MS with focus on immunology, biomarkers and treatment response; as well as studies in the pathology and genetics of MS. DMSC is part of the Department of Neurology, Rigshospitalet, and the Faculty of Medicine, University of Copenhagen. The research facilities are located in sections 6311 and 9392 at the hospital site. DMSC constitutes one of the European MS Centers of Excellence and has extensive collaboration with institutions in Denmark, in other European countries, as well as overseas. DMSC is supported by both national and international grants.
