Proper Citation: Southwest France Tumour Bank (RRID:SCR_004574)

Description: The Virtual Tumour Bank of the Canceropole Grand Sud-Ouest's mission is to federate the cancer research of four French regions: Aquitaine, Languedoc-Roussillon, Limousin and Midi-Pyrenees. This site allows access to an inventory of the specimens stored in the tumor banks of the Greater South-West region, within the laboratories of Pathology of the University Hospital Centers and Cancer Centers of Bordeaux, Limoges, Montpellier, Nimes and Toulouse. You may search by disease or multiple criteria. These specimens are removed from patients primarily to confirm and accurately characterize their cancer diagnosis, and are therefore stored by the tumor bank for diagnostic and/or therapeutic purposes. These samples can be re-qualified for scientific research pending that a number of conditions are met, including the absence of refusal from the person (in compliance with French regulations). So far, the tumor bank is a major tool for cancer treatment and research. This inventory is a further evidence of the coordination effort between the eight concerned tumor banks that have been mobilized at the service of patients and research within the framework of the Canceropole Grand Sud-Ouest programs. These biological resources are made available to research groups that conduct basic or translational programs in the field of oncology. They will not be made available for projects in fields other than oncology.

Abbreviations: SW France Tumor Bank

Synonyms: SW France Virtual Tumor Bank, Southwest France Tumor Bank, Canceropole Grand Sud-Ouest Virtual Tumour Bank, GSO virtual biobank, Southwest France Virtual Tumor Bank, SW France Tumour Bank, Canceropole Grand Sud-Ouest Virtual Tumour Bank, Tumorotheque Virtuelle du Canceropole GSO

Resource Type: biomaterial supply resource, material resource, tissue bank

Keywords: tumor, tissue, tumor tissue, serum, plasma, bodily fluid, frozen, liquid nitrogen, paraffin, dms, dry, cancer, neoplasm, malignant, benign, oncology

Related Condition: Tumor, Cancer, Neoplasm, Malignant, Benign

Funding: French National Cancer Institute

Availability: Public / Varying: These biological resources are made available to research groups that conduct basic or translational programs in the field of oncology. They will not be made available for projects in fields other than oncology. The access to clinical, Anatomico-pathological and biological data is strictly under the responsibility of each Tumour Bank.

Resource Name: Southwest France Tumour Bank
